Job Title: Student assistant

We are looking for a computer science graduate student to participate in our NSF-sponsored research project on System Support to Enable AI at the Edge. Job description involves conducting research on the design and development of a distributed dynamic scheduler for the edge. The hourly payrate is $30/hr for 40 hours/week for two weeks (May 16 – May 31, 2024). If you are interested, please provide a short CV with relevant qualifications to Shiv Mishra (mishras@colorado.edu). We will start reviewing the applications immediately.
